Subject: Re: Letter from DNR regarding Road Maintenance Stormwater App

I think we're set for Thursday at 1pm (central). The call in number is:
218-862-6420
543030#

I think the topic is technical discussion of appropriate stormwater control for Bulk Sampling.
thanks,
john

Hi Cyrus,

Thank you for sending the letters.

Friday next week won't work, as I'll be out of the office due to what was previously planned to be an all-agency furlough day... I am available Thursday afternoon. Tuesday afternoon and Monday are also possible, but I think Thursday would be best if it works for your schedules.

Subject: Letter from DNR regarding Road Maintenance Stormwater App

Hi Krista,

Here's the letter Brad Johnson sent to the company regarding additional information needed to process their stormwater application. I've also included Larry's letter from last week.

If there are good times next week (preferably Friday) for a follow-up call, our staff are available. Just let us know.

Best,
Cyrus
